

*"A builder to believe in"...since 1986*

11/9/09

To Whom It May Concern,

I had the pleasure of consulting with Randall Arendt on a recent residential subdivision on which we are working. Prior to meeting with Randall we had a conventional sketch plan laid out with 2-acre lots and we brought Randall in to see if he could do to improve the plan using the Conservation Subdivision approach.

While I had walked the project numerous times before, it was fascinating to walk the property with Randall. Although I have 23 years of experience in the building industry, I was very surprised how many things I was missing; He was able to see and preserve non-replaceable things such as old growth trees, steep slopes, wetland areas, and most importantly preserve open space. The plan evolved into a work of art that is truly heads and tails more desirable, not only from an environmental standpoint, but also to today's more discriminate customers.

I would definitely recommend Randall looking at your next project!

Should you have any questions, please feel free to call me @ 570-424-6870.

Sincerely,

*Robert G. Brown*
